

# Christopher Brown

FRONTEND DEVELOPER

## ABOUT ME

Hello there, I go by Chris. I have been a frontend developer for almost two years. I'm interested in all things related to development, frontend to backend. Currently learning more about Redux state management and other headless CMS tools such as Prismic & Wordpress. I have a deep passion for learning & solving problems but a deeper passion for helping others learn.

## WORK EXPERIENCE

### THE BURGER STORE

WEB DEVELOPER | [THEBURGERSTORENASHVILLE.COM](http://THEBURGERSTORENASHVILLE.COM)

Feb 2021-Present

- Designed & built a full-stack website with mobile first approach that allows the user/admin to change sections of the site that need frequent updates. Site features public & private routing, context API with authentication.
- The goal was to bring awareness to the company & have features where the user/admin can add, update & delete descriptions with uploaded images for a dynamically generated menu. Site also includes a contact form for messaging directly from the site, viewable in admin panel.
- Technology: Next.JS, React, Context API, Sass, Bootstrap, noSQL database, Firebase/Firestore and Firebase/Auth.

### INK PRESSIVE

WEB DEVELOPER | [INKPRESSIVESCREEENPRINTING.COM](http://INKPRESSIVESCREEENPRINTING.COM)

Oct 2020-Apr 2021

- Co-designed with another developer & built a full-stack website that is able to handle custom order submissions, upload designs, dynamically generated instagram post, that has public & private routes with authentication.
- The goal was to bring awareness to the company & have features to meet the their needs that include an admin panel for updating weekly promotions & keeping track of order forms. Also be able to update FAQs about their business & services offered
- Technology: HTML, CSS, JavaScript, React, Material-UI, noSQL database, Firebase / Firestore, FireBase / Auth.

### LOCAL EVENTS APP

PERSONAL PROJECT | [LOCALEVENTS.VERCEL.APP](http://LOCALEVENTS.VERCEL.APP)

May 2020-Present

- Created & built full-stack website where users can create & update events details, upload event images & add location details on google maps APIs. Features dynamically generated events using public & private routing with JWT authentication.
- The goal was to have a website that would allow multiple users to interact with the application to create, update, delete events & also to have and introduction into headless CMS, backend development & SQL databases to improve full-stack development skills.
- Technology: Next.JS, React, Context API, CSS, React-Bootstrap, Node.JS, Express, SQL / Postgres database, Strapi & JWT.

## EDUCATION

### WEST KENTUCKY TECHNICAL & COMMUNITY COLLEGE

ASSOCIATE OF SCIENCE IN MATHEMATICS

2014-2016

## TOOLS

JavaScript React JS Next JS Gatsby JS HTML CSS SASS JSX Bootstrap
