EXPERIENCE

Web developer

INK PRESSIVE   Oct 2020-present

Ink Pressive is a small, first responder owned screen printing company. I built and helped design a website with a custom admin panel where they can receive orders from customers and a contact form where people can find out more about their offerings. Also the panel includes the ability to update sections of the site with featured items and new designs. In the admin panel also includes and area for instagram post with popup images and links to the their instagram. The site was built with a mobile first approach and has full CRUD functionality

Web developer

THE BURER STORE   Feb 2021-present

The Burger Store in a locally owned and operated restaurant that prides its self in locally sourced produce. I built and designed a website with a custom admin panel where they have the ability to change sections of their to reflect their menu as they offer weekly specials. The menu is dynamic so they can add and delete items as they change. The site was built with a mobile first approach and has full CRUD functionality

Personal Project

COVID-19 APP   Apr-May 2020

Knowing people who were personally afflicted with this virus I decided to build a small web-app that people could visit so they could see daily changes in their state as well as the national trends represented graphically that start from the first reported case in the United State in January 2020 to present day.

Personal Project

LOCAL EVENTS APP   Apr 2021-building

Now that the pandemic is finally getting under control, I wanted to build an app that would allow people to reconnect through local events. For myself and my partner I know it was tough this past year not having that social environment as we loved attending events and trying new restaurants. This app will allow users to create and display upcoming events in their area. Local Events App has full CRUD functionality

EDUCATION

Associates in Math

WKCTC   2014-2016

Engineering physics

MURRAY STATE UNIVERSITY   2012-2014

TOOLS

JavaScript | React JS | Next JS | HTML | CSS | SASS | bootstrap | React bootstrap

Material UI | Firebase | Strapi | Git | GitHub | VS code

SKILLS

Problem Solving | communication | mobile responsive design | functional programming

OOP | ES6+ | Git
